Claims 1, 4, 5 and 8-10 are presented for examination.

The amendments and remarks filed on April 7, 2008 have been received and entered.

Claims 1, 4, 5 and 8-10 are rejected under 35 U.S.C. 103 (a) as being unpatentable over Dean et al. (US 6,166,073) in view the patent abstract of Japan and Helberg et al. (US 6,646,001) for the reasons set forth on pages 2-5 of the office action of January 7, 2008.

Applicant's arguments and remarks have been carefully considered, but are not deemed to be persuasive. Applicant alleges criticality to the lack of turbidity due to the use of benzalkonium chloride with R being alkyl of 12 carbon atoms or using a nonionic tonicity agent. The arguments in the absence of supporting evidence commensurate in scope with the claimed language are not well taken. Applicant refers to the presented data in the specification in order to establish the advantages of using the claimed formulation over the prior art of record. Such data use only one concentration of latanoprost and a couple of concentrations of BAK. Such data are not commensurate in scope with the claimed language.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
